Withdrawal of SMPTE ST 430-7-2008 D-Cinema Operations —Facility List Message

This Standard has been withdrawn and its content is no longer endorsed by the Society. This action has been taken because it is judged that there is a significant possibility that use of the document may cause harm.

To issue D-Cinema Packages (SMPTE ST 429-2) and corresponding Key Delivery Messages (SMPTE ST 430-1), it is necessary to collect information on devices present at the target exhibition facility, e.g. digital certificates, 3D capabilities, etc.

SMPTE ST 430-7:2008 was initially developed to satisfy these requirements.

SMPTE has, however, found no evidence of SMPTE ST 430-7:2008 being used within the D-Cinema community, and has instead found evidence of ad hoc solutions designed to fulfill the same requirements as SMPTE ST 430-7:2008.

In response, TC 21DC has developed SMPTE ST 430-16:2016, which is intended to reflect current practice in the D-Cinema community and replace SMPTE ST 430-7:2008.

SMPTE ST 430-7:2008 and ST 430-7:2008 Am1:2011 are therefore withdrawn, and users are encouraged to consider SMPTE ST 430-16:2016 instead.
